What We Can Do For You

Customised Projects

What We Can Do For You

The French weaving workshop and creative house

The company was founded in the **South of France** in **1992**, focusing on fabric trading. Today, the Group boasts **50 wide-width looms**, producing **2 million meters of fabric annually**, with over **3,000 refs** including jacquards, prints, fire-resistant fabrics, imitation leather, and outdoor materials.

This facility enables the production of jacquard fabrics in **France**, maintaining a **well-guarded in-house expertise**.

Our French design studio comprises textile designers who blend **creativity** with **technical skill**. They craft patterns, textures, weave designs, shiny threads, mixed linens, and embroidered effects, creating **unique atmospheres** that reflect **current trends** and **individual desires**.

Both **traditional** and **contemporary**, our collections are celebrated for **the quality of our jacquards** and the **originality** of our designs.

OEKO-TEX STANDARD 100 certified

Our fabrics are OEKO-TEX STANDARD 100 certified. Oeko-Tex is a quality label with various standards certifying the health and ecological safety of textiles and leathers, ensuring they are free of toxic substances for both the body and the environment.

CUSTOMISED PROJECTS

If you're looking for **customizable fabrics** tailored to meet **your specific needs**, whether you require large quantities or unique designs, we are equipped **to deliver exceptional results.**

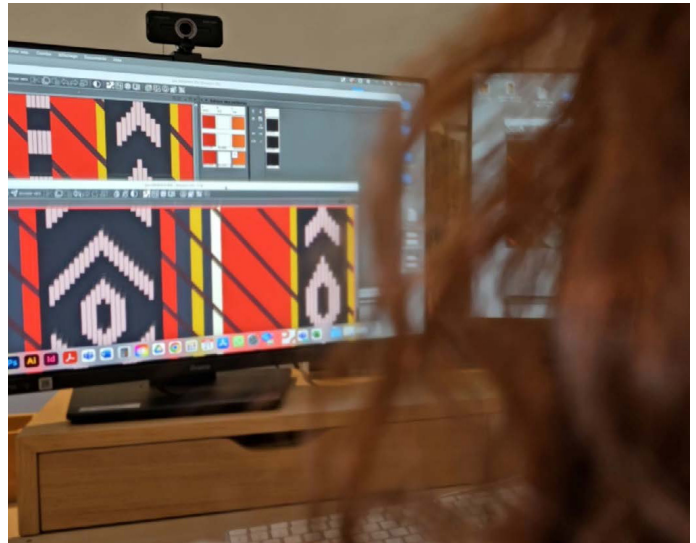

Here is an example of project we can create according to your specific needs.

Let us bring your fabric ideas to life, **no matter the scale or complexity.**

CUSTOMISED PROJECTS

Textile design is the **craft of developing fabrics** through **patterns, colors, and textures**. This discipline encompasses both **the artistic and technical aspects** of **weaving threads** or yarns to produce cloth or fabric, which can later be **printed or decorated** in various ways.

A textile designer is **an expert** who focuses on **crafting patterns and textures for fabrics**. They operate across **multiple sectors**, such as fashion, home decor, and interior design. Their job entails **creating new designs** that will be printed, woven, or knitted into fabrics, which are then **used to make clothing and accessories**.

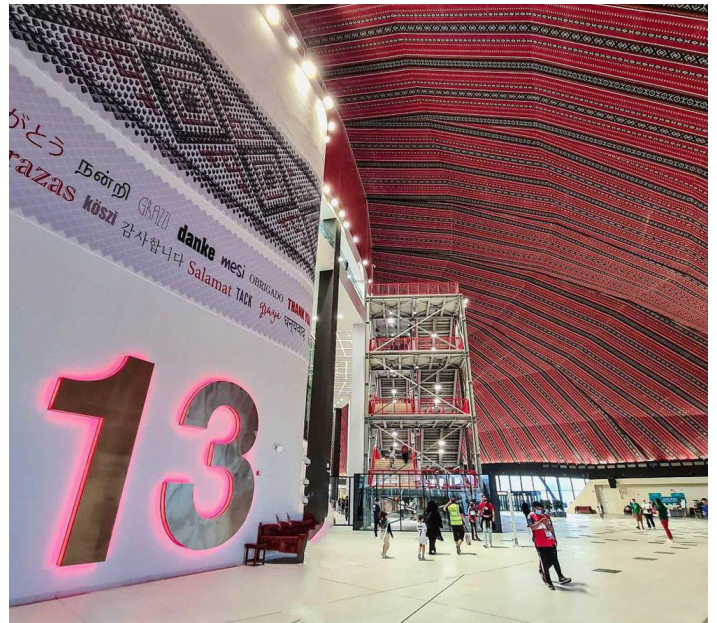

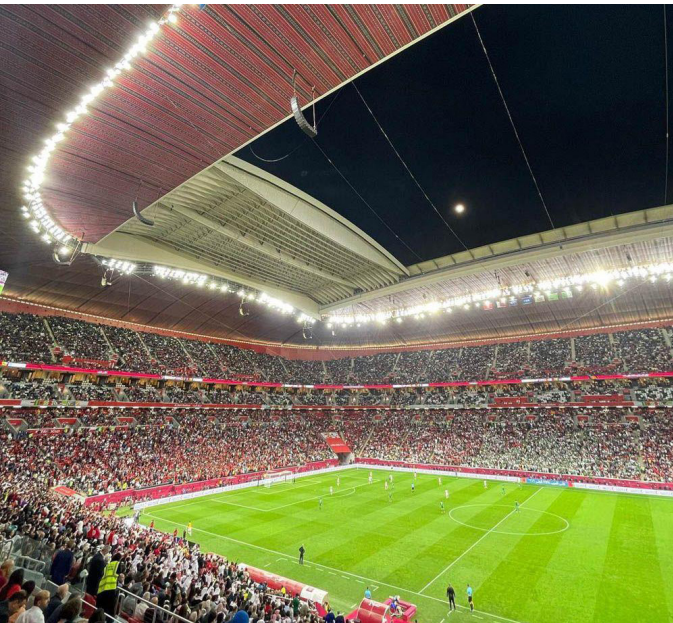

To thrive in this field, a textile designer requires not only **a strong aesthetic sense** but also **a solid understanding of computer-aided design tools** (like Adobe Photoshop and Illustrator), **production techniques**, and the **characteristics of various materials**.

Weaving is a technique that involves **arranging threads on a loom**. This creates fabric with **vertical warp threads** and **horizontal weft threads**. The warp threads run **lengthwise**, while the weft threads run widthwise across the loom. There are different weaving methods, such as **plain weave, double weave, twill weave, satin weave, and jacquard weave**. Each method produces **unique patterns and effects** in the finished fabric.

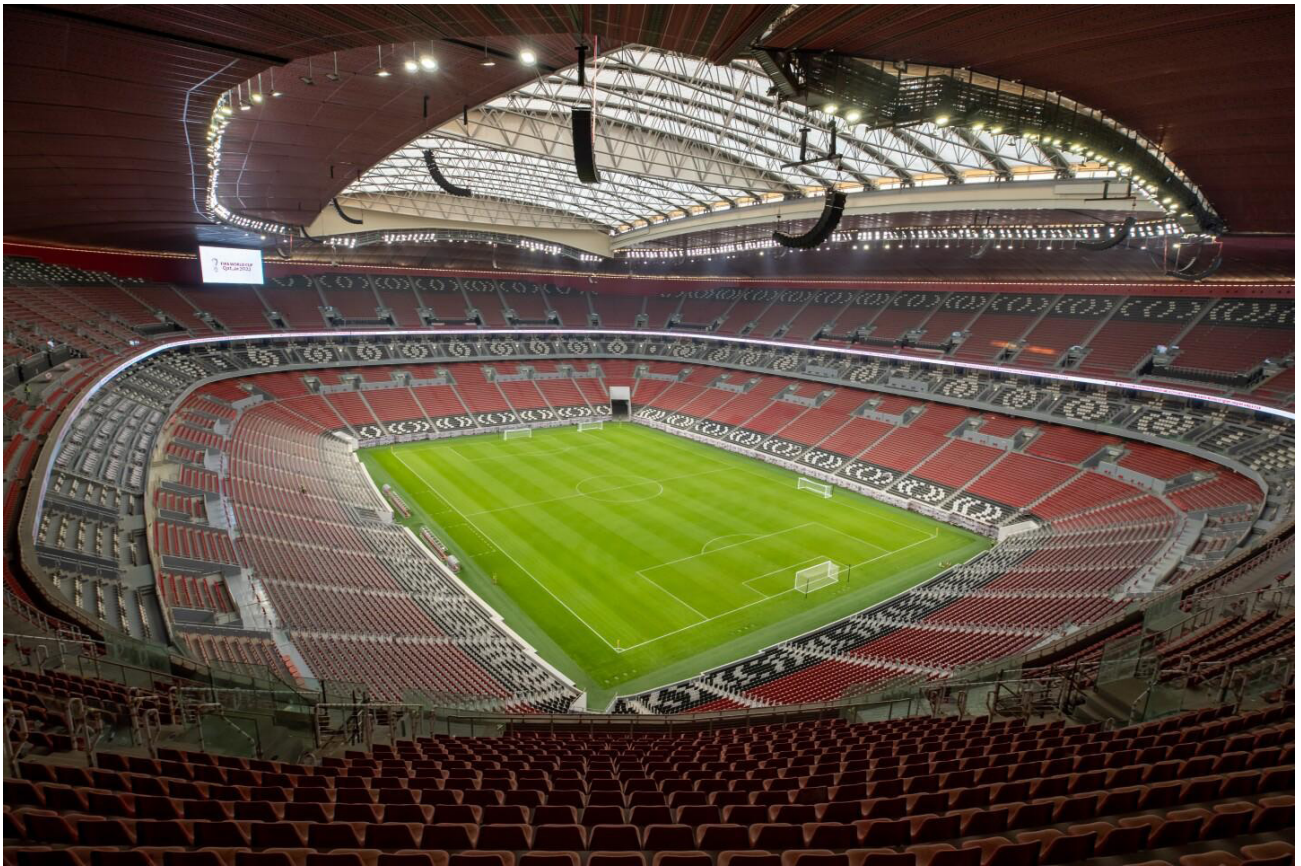

CUSTOMISED PROJECTS

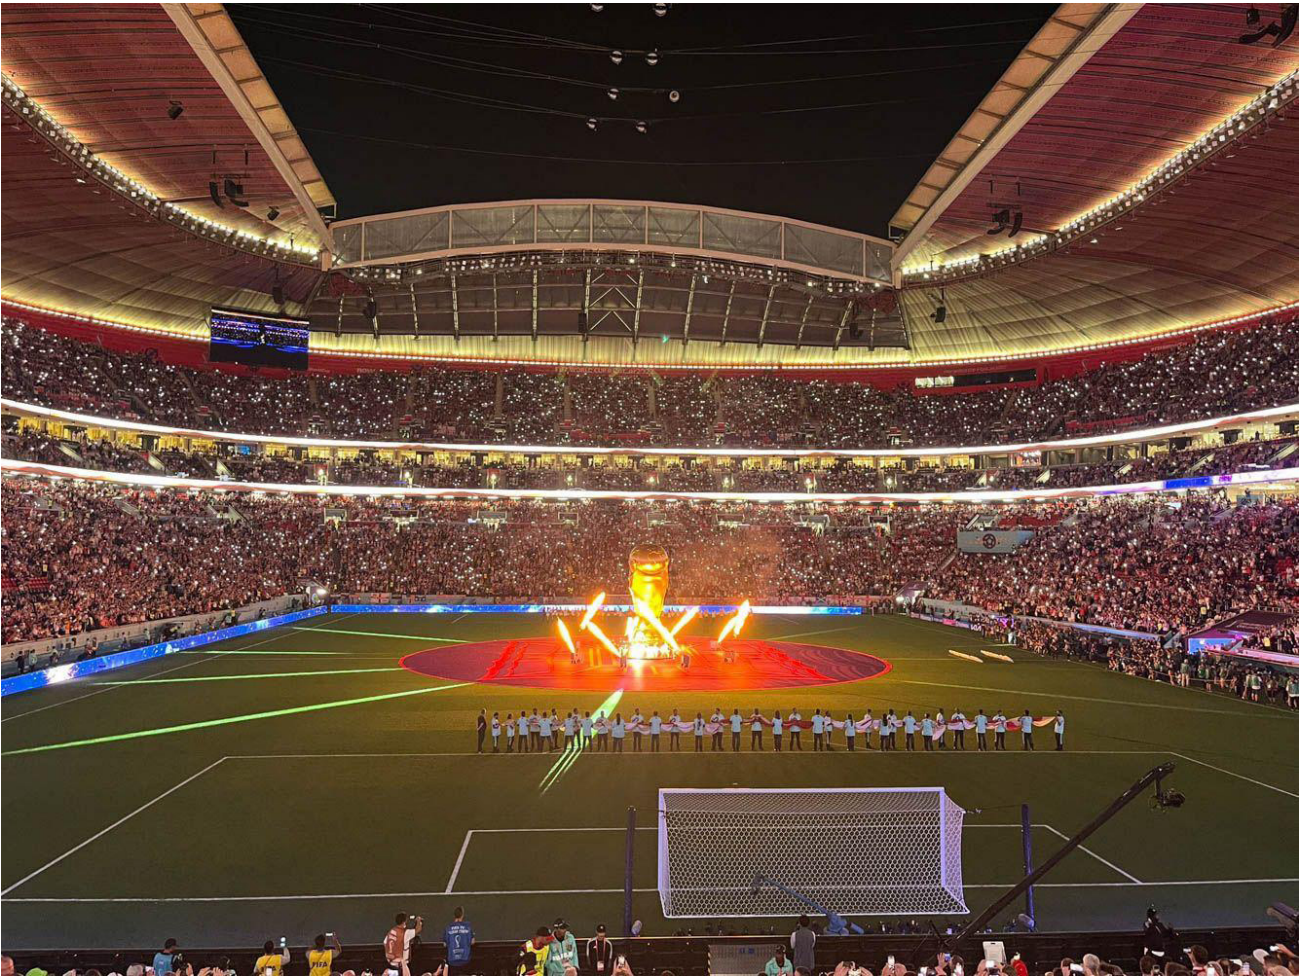

Inaugurated in **2020**, this **68,000-seat stadium** was built specifically for the **2022 FIFA World Cup** in **Qatar**. Its unique design draws inspiration from the traditional “**bayt al sha’ar**” tents of the **nomadic Gulf region**. Qatar aimed to create a stadium reflecting **its culture and heritage**.

Additionally, the stadium is **demountable**; after the World Cup, its upper section will be **repurposed into a 5-star hotel** and a **shopping center**. This eco-friendly stadium utilizes **solar energy** for the parking lot and surrounding park lights, and it is designed to convert its surroundings into a **camel racing track**.
