PRODUCTS

WOOD DECK TILES

- Wood deck tiles are creatively designed and woodchips are installed on a plastic base for a tiling shape of 300mm x 300mm size. Easy for installation through the plastic interlocking system. Products have become a new trend and are used for apartment balconies, garden miniatures, exterior lobbies for lobby, pools, bathrooms, sauna bathrooms.
- 100% environmentally friendly materials, waterproof, anti-slip, anti-termites, sustainable.

PLASTIC DECK TILES

- Plastic deck tiles have become the 21st century's decoration trends.
- Plastic deck tiles are made of HDPE natural plastic, no mixing, no using recycle plastic.
- Suitable for all climates, extremely high UV protection up to 1000 hours, waterproof, high anti-slip friction. The color of plastic is also the color of the material that is not paint coating so that the products will not discolor or fade out.
- Plastic deck tiles are applied to decorate for bathrooms, balconies, gardens, pools, parks,... and other constructions.

GRASS DECK TILES

- Grass deck tiles are a great choice to create green space for your home, bringing freshness, beauty and close to nature feeling. Great endurance, waterproof and temperature resistance, suitable for outdoor spaces.
- The 2.5cm high grass provides smoothness and creates real feeling of walking as real grass.
- The base is made of PE plastic, with high strength and great endurance.
- Decoration for: garden, lobby, outdoor hallway, pool, balcony, cottage decoration...

RUBBER PLANK

CODE: GPS-24

Type: Rubber Wood

Color: Follow as your design

Common Uses: Furniture, cabinetry, interior millwork, kitchen woodenware (cutting boards, knife blocks, etc.), and other small, specially wood items.

QUALITY RUBBER PLANK AA

This is the highest quality rubber compound. It is popular for making furniture products that need high precision, absolute beauty. With harmonious colors, the edges on both sides are beautiful.

QUALITY RUBBER PLANK AB

In this line, one side will be as described in line A above. On the B face, there is a small black eye line about 5mm. This line of AB rubber laminated boards is very suitable and popular for making: Table tops, kitchen doors, cabinet doors...

QUALITY RUBBER PLANK AC

Like the AB series, the A side will be absolutely beautiful with no black lines. The C side has many black lines, which is quite bad compared to AA and AB types. This type is often used for wall tiles, floor tiles or floor coverings... it is very suitable because it has only one beautiful side.

Advantages

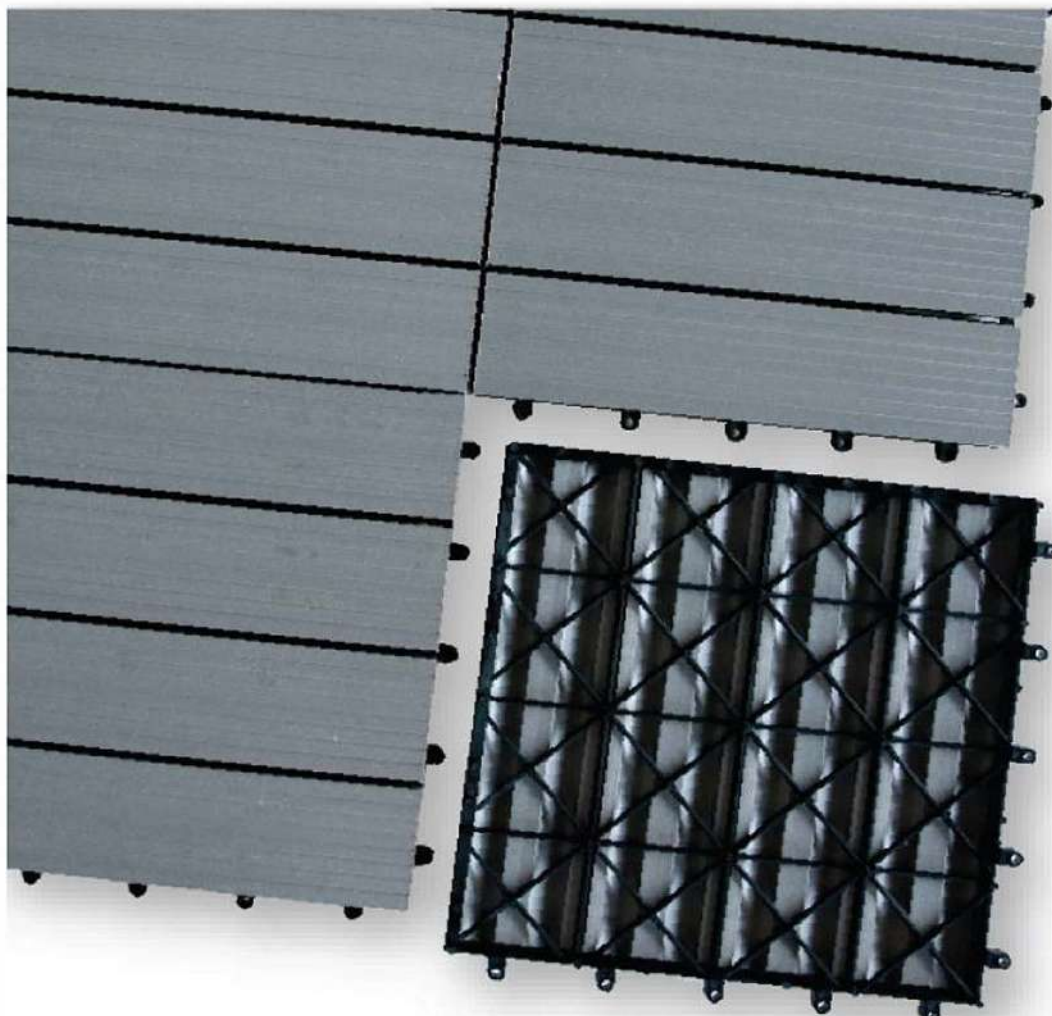

Rubber plank board inherits many advantages of natural wood and can completely replace natural wood thanks to its mechanical strength, water resistance, bearing capacity...., so they are used in many types of construction and housing projects.

This is also a popular wood, easy to produce thanks to available materials, is sustainable because of the use of planted forest wood and is being expanded especially for the furniture industry.

In addition, also used as wall panels, ceiling boards and flat panel details.

In particular, in the construction industry, Rubber plank boards are used in beam structures, as formwork for the concrete industry. It is also used a lot in the interior: manufacturing furniture, making accessories for the wood window industry, etc.
