DECKING

Create a leisure space isn't a luxury

New products New technology

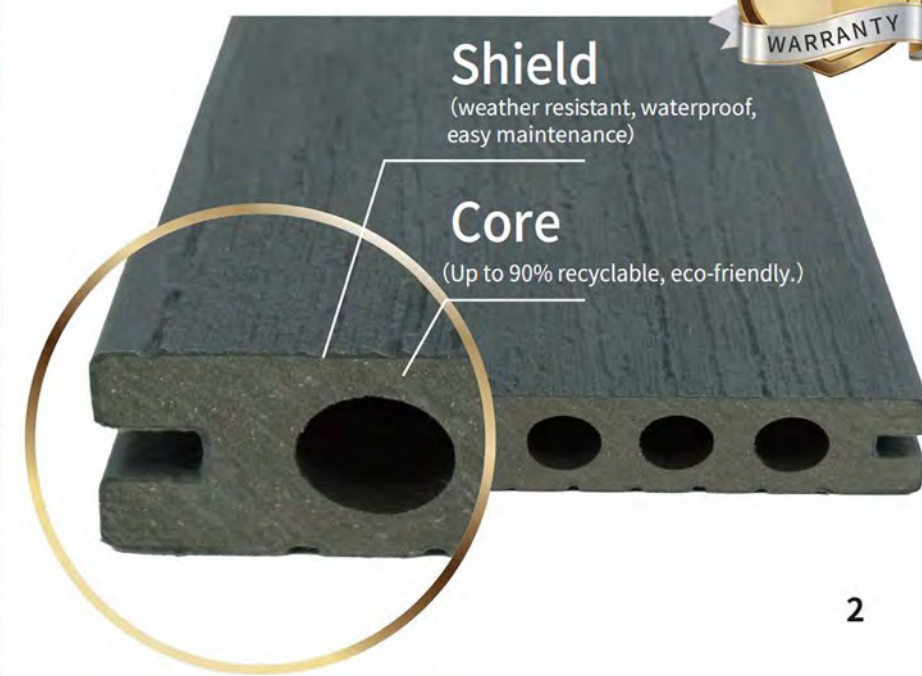

Unlike classical composite decking (1st generation), co-extrusion decking (2nd generation) performs much better on physical properties.

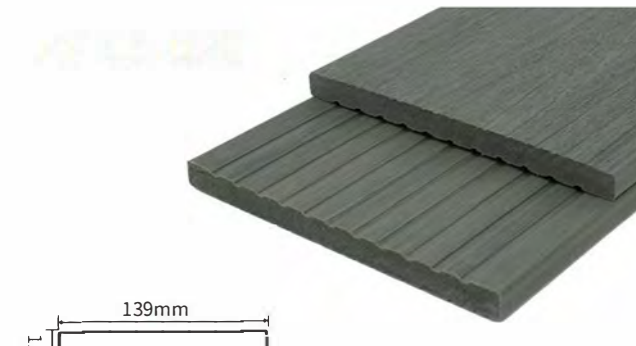

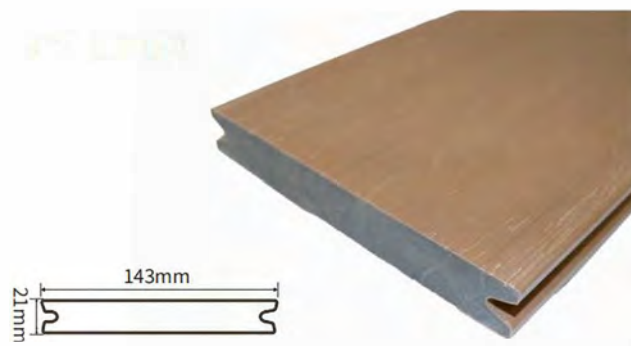

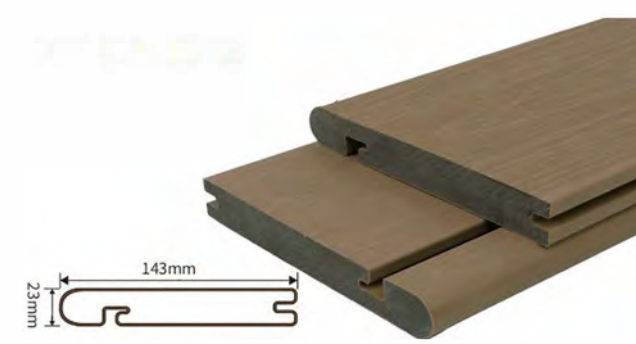

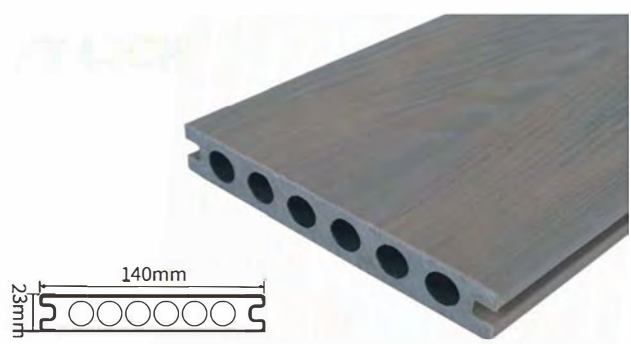

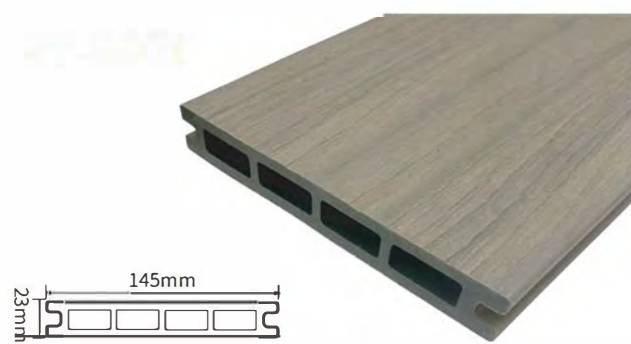

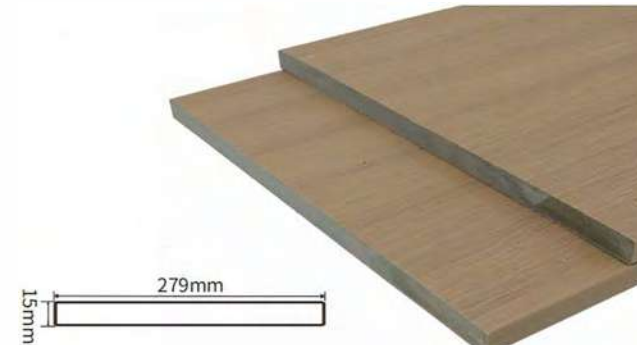

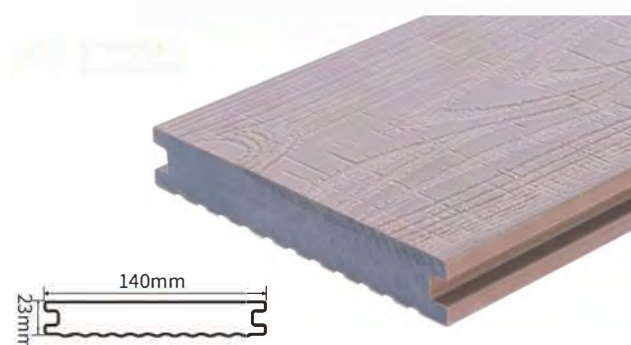

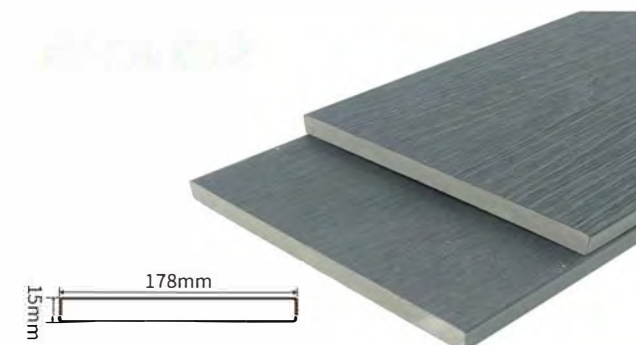

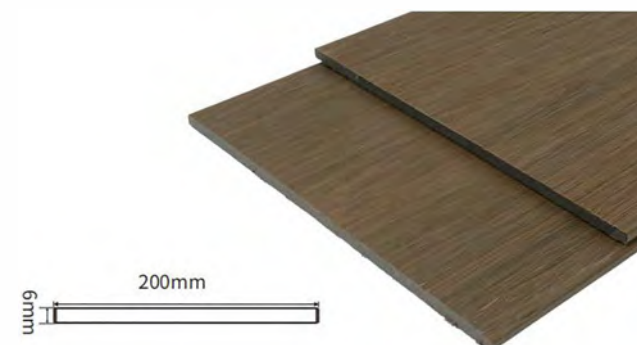

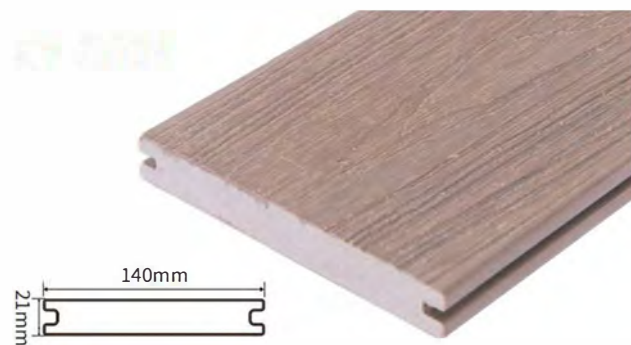

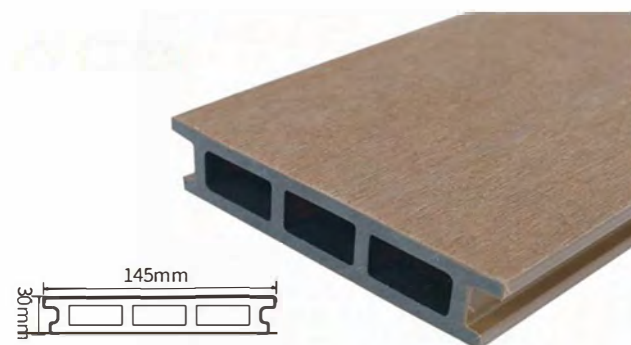

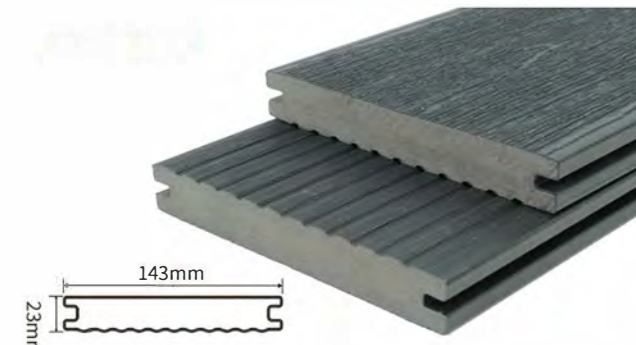

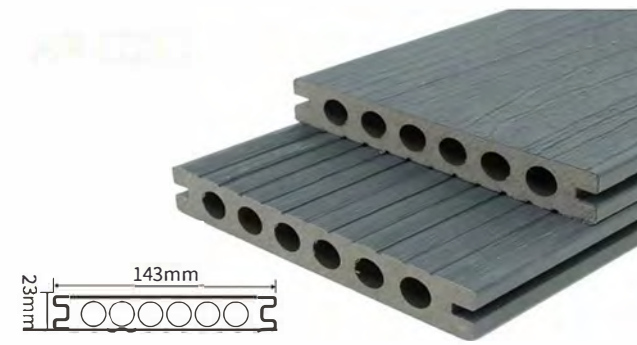

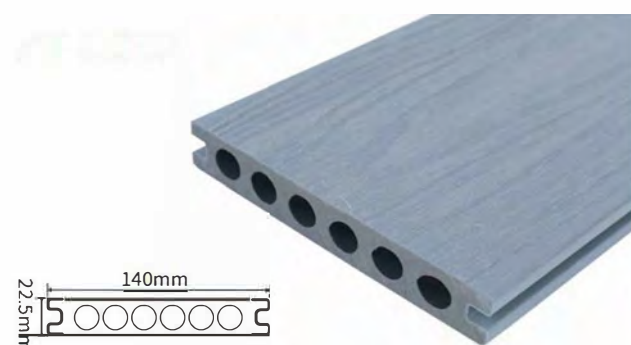

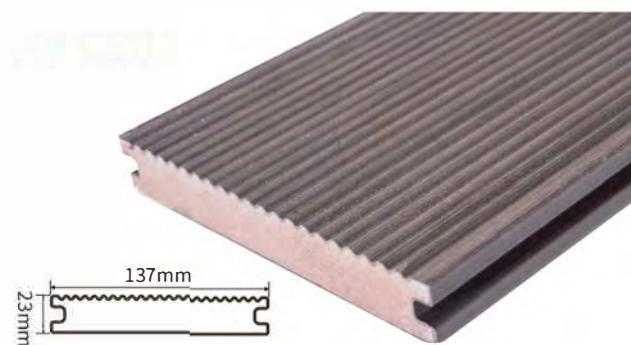

It's more waterproof, oil and stain resistant, dimensionally stable and durable.

With the latest technology we can make dual colors on a single board and more colors & finishes are available

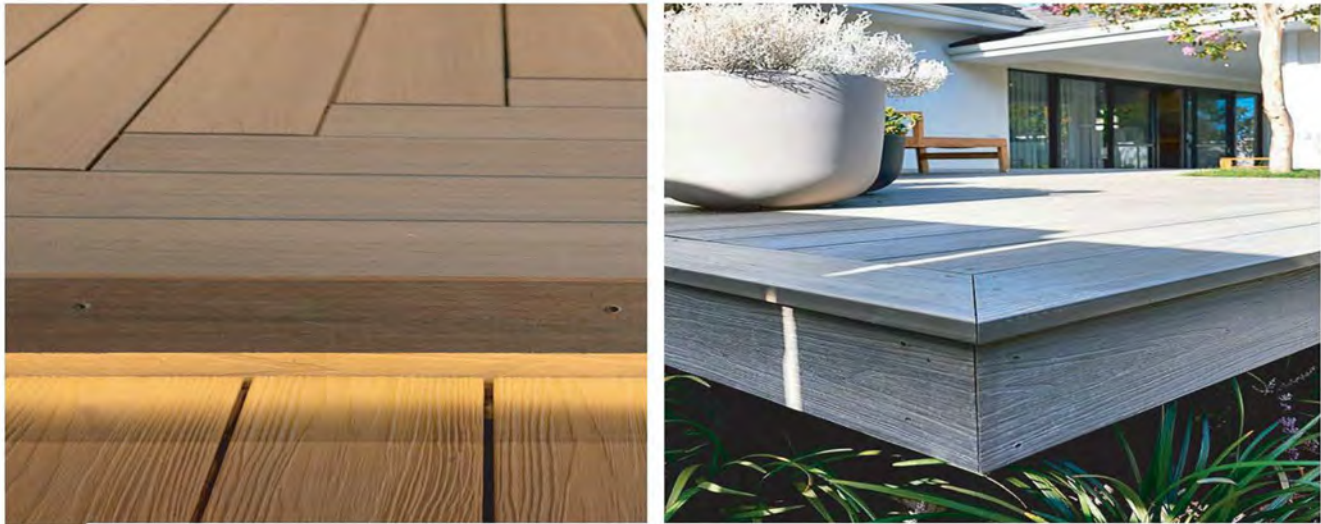

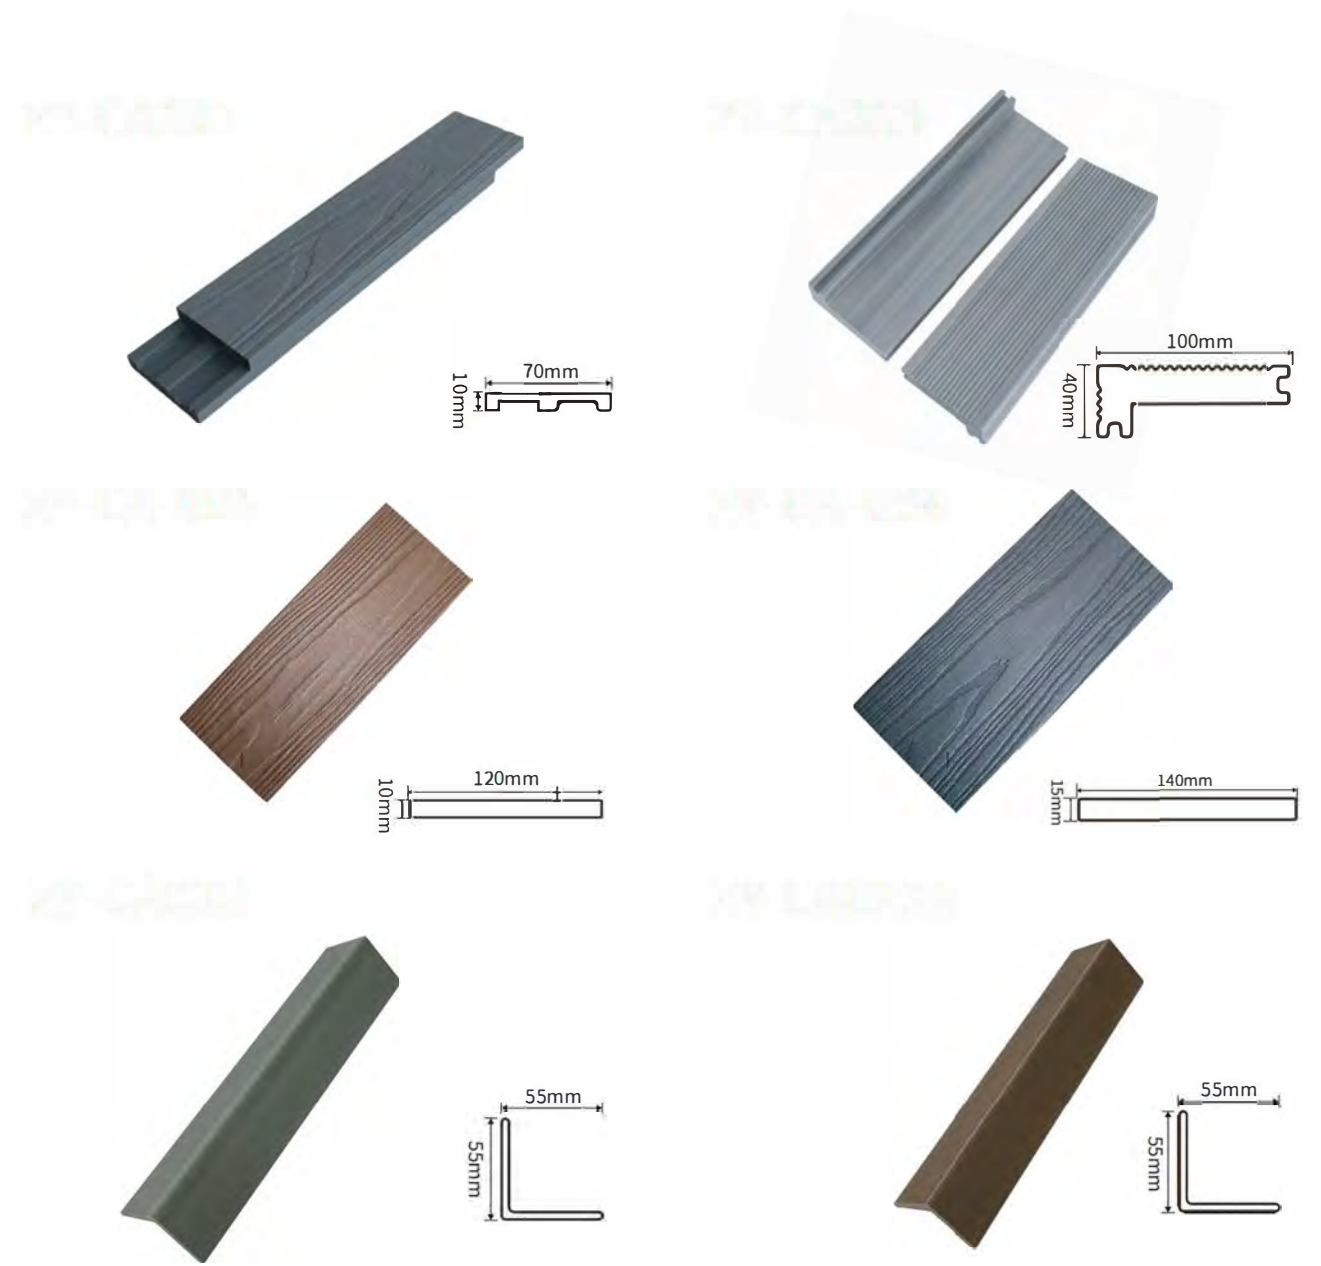

PRIMARY BENEFITS

- WATERPROOF
- ECO-FRIENDLY
- ANTI-SLIP
- FIRE-RETARDANT
- ANTI-UV
- ANTI-WARP
- ANTI-MOLD
- TERMITE-FREE
- ANTI-CRACK

LIGHT GREY

CHARCOAL

Mixing different colors in one area is like flipping a palette, it appears unconventionally, but matches the environment reasonably.

PVC/ASA Decking

With its reinforced strength& natural matte appearance, PVC ASA co-extrusion decking is one of the latest options for landscapers.

DIY TILE

One of the advantages of composite deck tile is the convenience of installation. Its interlocking design makes it easy to install or remove. They can be used to decorate either interior or exterior space, and they will spare you from maintenance annoyance for the years to come.

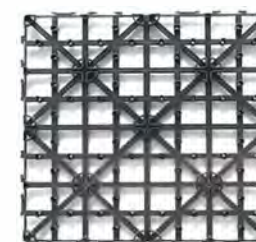

2 sides locking base

With 2 sides locking base, you can install the deck tiles in a same direction easily.

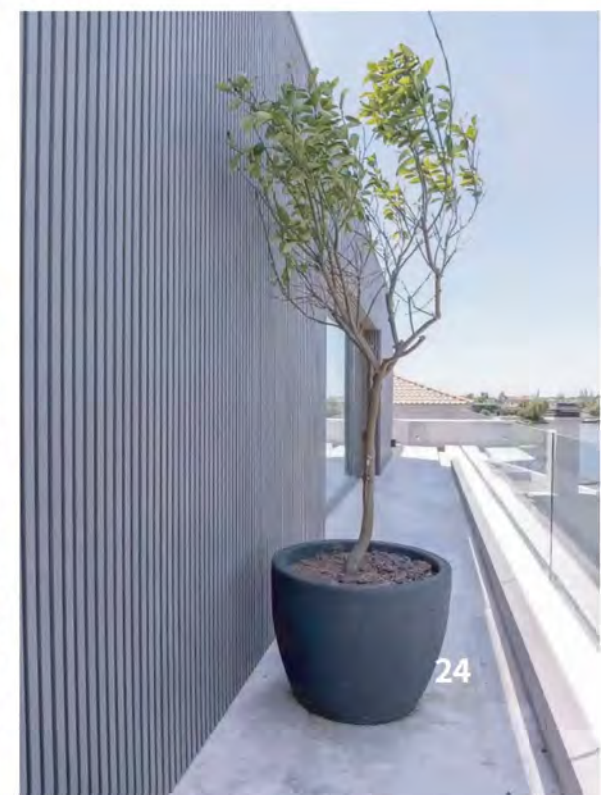

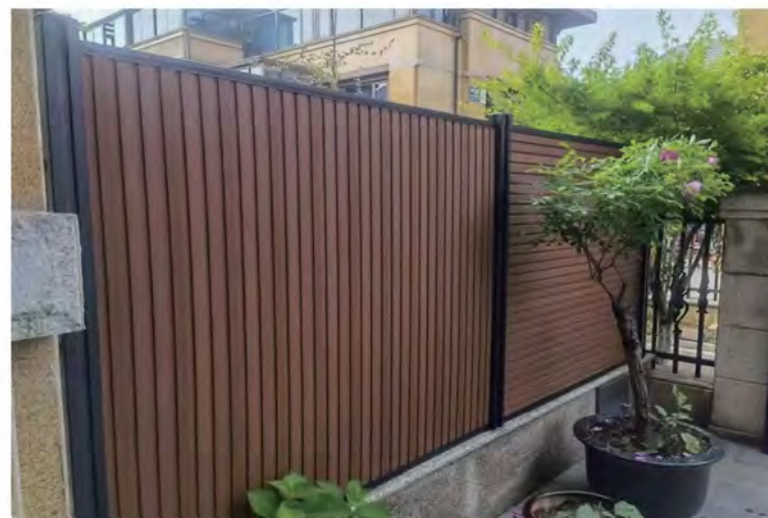

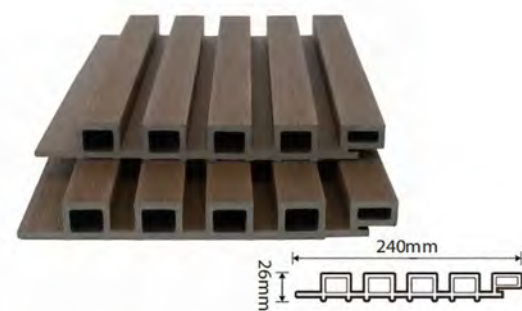

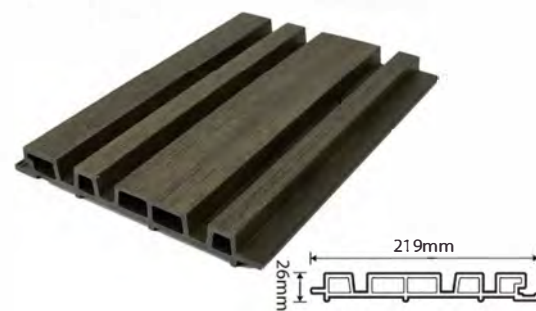

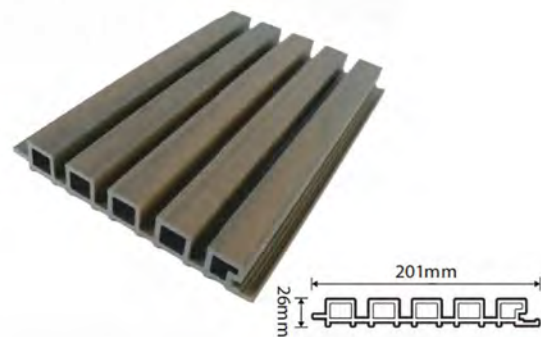

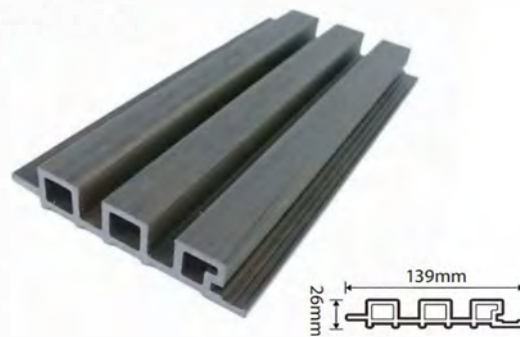

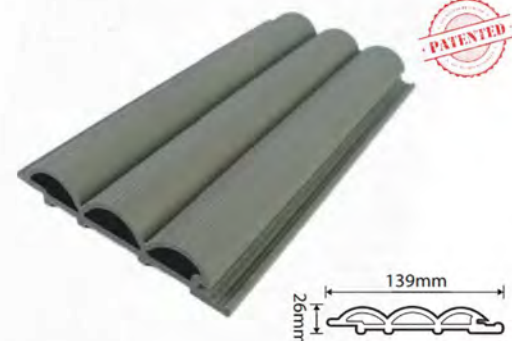

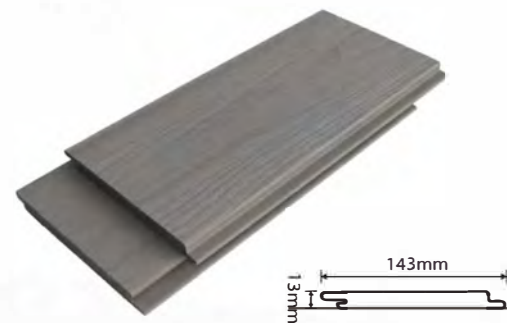

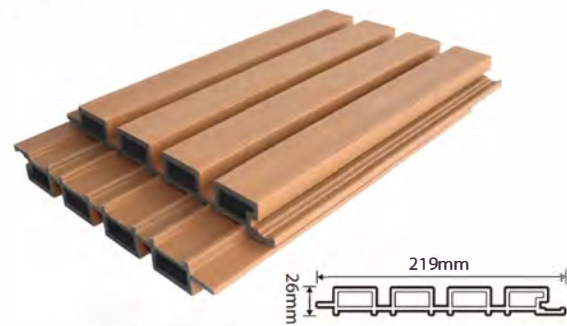

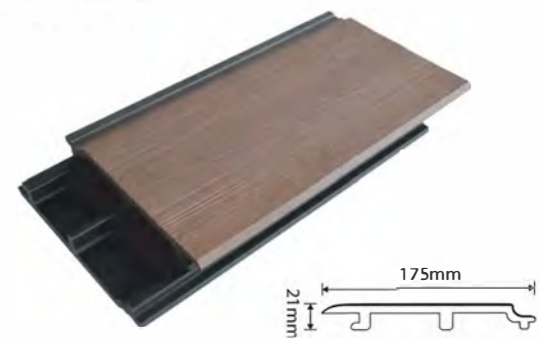

4 sides locking base

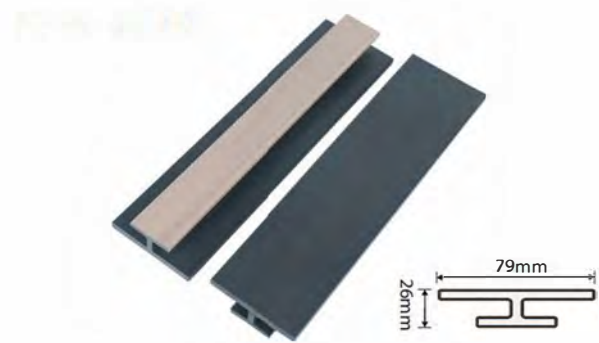

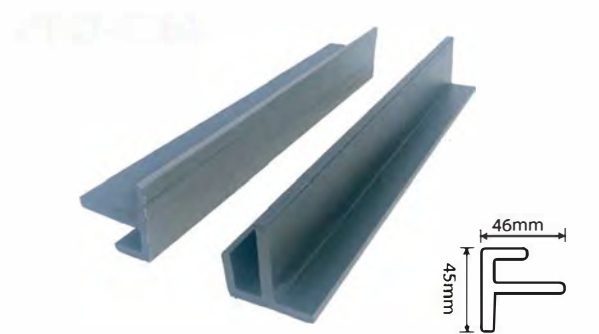

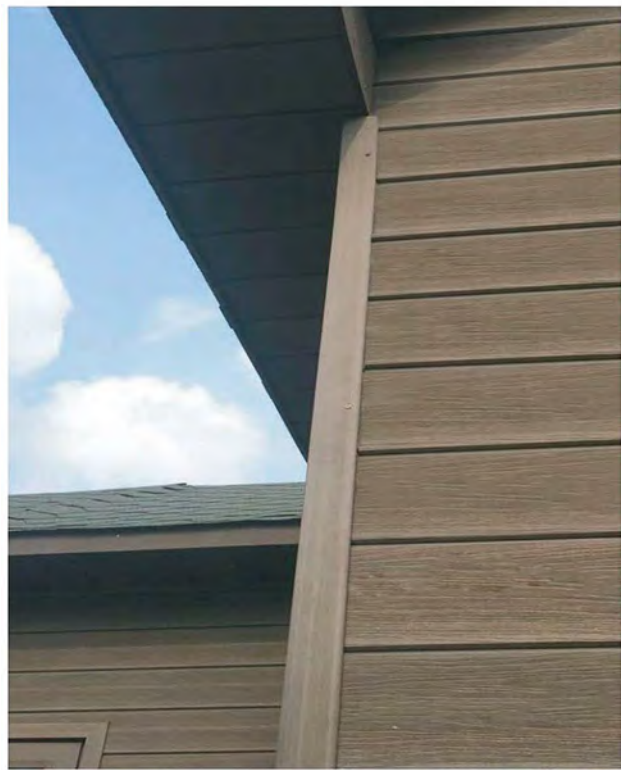

With 4 sides locking base, you can install the deck tiles in either direction freely.
