

Connected Lights Catalog

Smart Home System

The three smart home systems of smart electrician, smart lighting and smart security are innovation-driven and market demand-oriented, which use AI voice built in, 2.4+5G dual-frequency and other core technologies to provide users with a smart, convenient, safe and energy-saving home lifestyle.

Gosund brings the smarter lifestyle for you. Every device can be remotely controlled through the dedicated App and easily integrated into smart home scenes. Turn on/off, change colors, adjust brightness, personalized your schedules and more with cellphone from anywhere and anytime.
