Children's vitality and potential is unlimited. During their childhood, we should help them develop their independent thinking ability and protect their curiosity through exploration and experiences, since those are basic to independent thinking. Creating more situations for children to think is the basic function of our facilities.

Cage Climbing design based on the evolution of three keywords: nature, exploration, and thinking. Complete and scientific climbing path design, it's used to create a climbing sports system for children with a variety of recreational exercise modes.

Can be embedded next to caged courts, playgrounds, court fences, park play areas, campus activity areas, kindergarten activity venues etc, it is convenient for parents to accompany children during parents' other activities.

20023504

20023503

All kids in the world are entitled to be equal, they need happiness also security.

The principles of physics enlightened the purest curiosity of childhood

Children have the purest curiosity about the world. In their little world, there are too many questions: How did light come? How does the sound come out? And all these are the basic motion forms and laws of matter, and physics is the foundation of all understanding of the world. Physics lurks a huge charm, and the mystery contained in the physical transformation enlightens children's childhood imagination. Physically visualize the principles of acceleration, energy transfer, light energy conversion, and the wavelength of sound in the air. Create a series of technology transformations powered by physics. This series is a science popularization of physics, but also gives children the answer to the world.

Return to climbing, sweat,
explore, and think

Riding a wooden horse, swinging, imagining that he is the hero of the horse Rooted in childhood dreams, want to be a child who will never grow up Combining a variety of interesting shapes, the visual fusion is extremely high, and the environment is integrated There are not only rocking horses, but also flowers, turtles, sharks, planes, etc., with lovely shapes, bright colors, and fun to shake Swing equipment is mainly to exercise the control of the child's body center of gravity Help the child's vestibular development, improve the body's control and coordination skills The swing equipment is a very important equipment composed of children's area With its small area requirement, diversity, and easy operation, more than 100 kinds of shapes are arbitrarily matched in the design of the children's area.
