

Container House Catalog

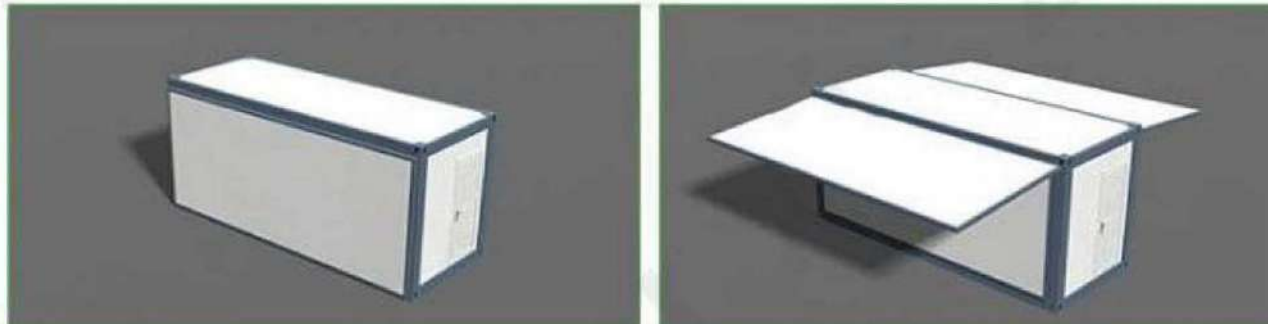

01 Product introduction

► Expandable container house

The expandable container house can be expanded, which increases the usable space in the house and creates a living space with greater comfort and freedom. The design of the two-wing expansion room focuses on diversity. Each functional area and room can be selected and customized according to the needs of users, so that the functionality of the house can be maximized. Whether it is a family residence, a studio or a leisure space, expandable container house can provide a variety of living experiences by adjusting the composition structure.
